

On the Subject of Coloured Arrows

The point is, there is no point.

On the module are 4 directional buttons, and a display screen in the middle.

If the buttons are not uniquely multi-colored, you're looking at a different module.

On the screen is a random arrow with one of four different colours. Use the screen colour with the screen arrow to determine which coloured arrow to press below. On every correct press, the screen will show a new coloured arrow and the arrow colours will change. Keep pressing the correct arrow, and the module will be disarmed after 7 consecutive correct presses.

Pressing an incorrect button will register a strike, and the module will reset your streak alongside changing the arrow colours and display.
